# New Awards Announced

- FOR IMMEDIATE RELEASE:
- **NIEHS Awards \$37 Million to Train Emergency and Hazardous Waste Workers**
  - More than \$37 million will go to workers involved in emergency response and hazardous waste clean-up from awards just made by the National Institute of Environmental Health Sciences (NIEHS), one of the National Institutes of Health. The grants will provide training designed to protect workers and their communities from exposure to toxic materials encountered during hazardous waste operations and chemical emergency response.
  - "There is no better way to protect the health and safety of workers who are involved in our nation's emergency response and hazardous waste clean-up efforts than to provide them with the proper training and education," said NIEHS Director David A. Schwartz, M.D. "These awards will provide workers with the skills and knowledge they need to protect themselves, their communities, and our environment from exposure to hazardous materials."
  - Some of these awards are granted under the newly created Hazmat Disaster Preparedness Training Program. The new program was developed in the aftermath of the World Trade Center Disaster, and is the result of the lessons learned by NIEHS-funded workers who participated in the subsequent clean-up of the affected area. These new awards will fund five training programs:
